## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 2-3, 5-6, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "one condenser" in claim 2 and 5 are doubly recited because it's unclear if that condenser is the same as "a heating condenser" recited earlier in the independent claims 1, 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8, are rejected under 35 U.S.C. 102(e) as being anticipated by US 2003/0213246 (Coll et al).

Coll et al discloses a method for controlling a combined power plant comprising a controller 125 for sensing many conditions including a mass flow, input and output temperatures of a condenser 102, said controller also controlling the desired output value based on electrical power output in amp/watt meter from the sensor S8, note page 5 and complete table 2. Regarding claims 2-3, 4-5, please note page 3,

Art Unit: 3748

paragraphs 25, 26, the desuperheater 106 may be bypassed so that the condenser 102 is heated by the exhaust steam from the steam turbine as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Paul and Aanstad disclose power plant having controller for sensing temperatures around the condenser area.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (571) 272-4861. The examiner can normally be reached on Tuesday--Friday from 12:30 AM to 10:00 PM.
